Listing Audit

15 points. Score your own listing.

Listing audit 15-point self-score card

Score your own listing (or one you're considering taking on as a cohost) against these 15 points. Total of 60 possible points. Anything below 40 has fixable problems you should address before scaling. Anything below 25 will lose you money on every booking.

The 15 points and how to score them

Give yourself 0-4 points on each. 0 = broken, 4 = excellent.

1. Listing title

Under 60 characters, primary keyword first, no all-caps, no emoji.

2. Photo count and quality

25+ photos minimum. Hero shot is kitchen or living room, not exterior.

3. Photo order on each platform

Airbnb, VRBO, Booking.com prioritize photos differently. Check all three.

4. Description length and structure

First 3 lines visible without clicking. Make them the strongest hook.

5. Review score and review velocity

Velocity > score. New reviews every 14 days is the threshold.

6. Calendar sync between platforms

Airbnb, VRBO, Booking.com, Furnished Finder all synced. No double-book risk.

7. Minimum-night stay rules

Right MTL for your market. 2nt weekday, 3nt weekend is a sensible default.

8. Instant-book setting

Off = loses lookers. On = risk of bad guests. Own the choice consciously.

9. Pricing strategy

Daily dynamic, comps reviewed monthly, weeknight/weekend spread correct.

10. Comp set

Three comparable properties within 5 miles, tracked monthly.

11. Cleaning and turnover

Named cleaner, written checklist, photo verification every turn.

12. Maintenance response time

Average days from "guest reports issue" to "issue fixed".

13. Owner responsiveness

How long does the owner take to answer YOU right now? Predicts the relationship.

14. City / county STR compliance

Permit number, license displayed, compliance status verified this quarter.

15. Payout structure and trust accounting

Who holds the money. Which bank. Whether it is licensed trust accounting.

How to score yourself

Be honest. The audit loses value when you inflate scores.

- 0 = broken or missing
 - 1 = present but ineffective
 - 2 = present and adequate
 - 3 = present and good
 - 4 = present and excellent
-

What your score means

Below 25: address points 1, 2, 9 first. These move the needle on every metric.

25-40: focus on points 5, 11, 14. These are the trust-and-compliance blockers.

40-55: you are operating competently. Optimization is fine-tuning now.

55+: consider moving from self-management to cohost scaling. You've earned it.

What this card does not cover

Scoring yourself is not the same as scoring what a prospective cohost sees. For the full audit you would deliver to an owner prospect, including what to fix and how to fix it, see Module 05 of the Cohosting Startup Kit.
