Guest screening script pack — 10 industries

Pre-approval message templates for the 10 most common STR property types. Each one is the same skeleton, tuned to what concerns guests with that stay in mind.

The base skeleton (Module 06 of the Kit)

Hi [guest name], thanks for your interest in [property name]! Quick few things so I can confirm you and the property are a good fit: 1. What's the occasion for the trip? (Weddings, birthdays, graduations, etc.) 2. How many adults and children will be staying? (matches what you saw in the booking request) 3. Have you stayed at a [cabin / urban / etc.] property before? 4. Anything about the property you want to confirm before booking? Once I have those answers, I'll send a confirmation and we can lock in the dates. Looking forward to hosting you.

Industry variants

1. Urban apartment (1BR / 2BR)

Add: "Quiet hours are 10pm-7am per the building rules. The building has a no-party policy. We don't accept bookings where the headcount exceeds the listing's stated capacity."

2. Suburban family home

Add: "The neighbors are long-term residents. We've asked them to be patient with normal family-volume noise during the day; loud outdoor music after 9pm results in neighbor calls and we have to cancel."

3. Mountain cabin / chalet

Add: "The road is plowed but AWD or chains are required Nov-April. Cell signal is unreliable at the cabin. The wood stove requires a 30-min fire-start procedure I'll send after booking."

4. Beachfront / coastal

Add: "The property has seasonal accessibility. Hurricane warnings May-Nov may trigger a refund policy I'll send with the confirmation."

5. Lake house

Add: "Boat dock access requires the dock fee waiver, which I'll send. No glass containers on the dock. Life jackets in the closet."

6. Desert / southwest casita

Add: "Summer temperatures inside can hit 100F+ between 1-5pm. The AC runs continuously; please keep doors closed during peak heat."

7. Vineyard / winery cottage

Add: "The hosts live on-site in a separate building. Quiet hours start at 9pm and we appreciate your consideration."

8. Ski-in / ski-out lodge

Add: "Ski equipment goes in the mudroom, not the living room. Hot tub use ends at 10pm per the HOA."

9. Urban loft / downtown studio

Add: "Same as the apartment rule — quiet hours, capacity, no parties. The difference is most lofts have a single key fob, so only the named guests on the booking can enter the building."

10. Furnished Finder / corporate stay

Add: "This is a 30+ night stay. The booking includes monthly cleanings and utility caps overage of \$X. We can adjust utility setup if your team will be remote on weekdays."

How to interpret the answers

Same pattern across all 10 industries: hesitation to answer any of the four questions = mismatch; headcount mismatch = misrepresentation; "small gathering" language with 8+ guests = party risk; local short-lead-time = consider declining.
